Citation: Eriso F. (2026) The 46 DNAs found in the Genome of a person are functionally Interdependent, *British Journal of Multidisciplinary and Advanced Studies*,7(6),1-22

Abstract: *The 46 DNA molecules, organized as 23 pairs of chromosomes in a human cell, are functionally interdependent because they collectively contain the complete genetic blueprint for a human organism, and the various genes as well as regulatory elements located across these chromosomes work together to control development, cellular function, and reproduction. While individual genes might have specific functions, they are part of a larger, coordinated system. Each of the 46 DNA molecules (chromosomes) contributes a portion of the total genetic information. The key objective of this study is to prove that the 46 DNAs found in the Genome of a person are functionally interdependent. The contents of* ***Figures*** *and* ***Tables*** *herebelow are designed to serve as evidential components of Methods & Results in the targetful strategy of this study.Each of the 46 DNA molecules, or chromosomes, contributes (performs) a portion of the total function directed by the baseline* ***Genome*** *for synthesizing itself and the entire body of its individual person. With this functional interdependence of the* ***Genome's*** *46 DNA molecules (chromosomes) in mind, if any kind of functional error such as Down Syndrome and Double aneuploidy is committed with anyone of the 46 DNA molecules, the effect will be manifested straight forward in the phenotype of the individual person synthesized, proving the fact that the 46 DNA molecules of the human* ***Genome*** *are functionally interdependent (See Figure 15f, and Table 2, of this paper).*

Keywords: Genome, DNAs, Interdependent, Double aneuploidy, Ribosome, Naked Genome, Subviral microorganism, Creator, Creatures, Almighty God (Allah)

INTRODUCTION

The 46 DNA molecules, organized as 23 pairs of chromosomes in a human cell, are functionally interdependent because they collectively contain the complete genetic blueprint for a human organism, and the various genes and regulatory elements located across these chromosomes work

together to control development, cellular function, and reproduction [1 to 3]. While individual genes might have specific functions, they are part of a larger, coordinated system.

Interdependence Explained in Detail**:**

►Complete Genetic Blueprint:

Each of the 46 DNA molecules, or chromosomes, contributes a portion of the total genetic information. All these pieces are necessary to provide the instructions for the entire organism, from cellular processes to physical traits.

►Hierarchical Organization:

Genes are organized on chromosomes, and the expression of genes is often regulated by other DNA sequences and proteins. The specific arrangement and combination of genes on each chromosome, and how they interact with genes on other chromosomes, is critical for normal function.

►Coordinated Cellular Processes:

Many cellular processes, such as growth and reproduction, require the coordinated action of multiple genes located on different chromosomes. For example, the genes that control cell division or sexual development are spread across various chromosomes and must work in concert.

►Functional Units:

Beyond coding genes, DNA also contains regulatory sequences and other functional elements that control when and where genes are expressed. These regulatory elements are also part of the interdependent system, ensuring proper function across the genome.

Evolutionary Significance:
The fact that certain DNA regions are highly conserved across species suggests they are functionally important and thus interdependent on a larger evolutionary scale. Changes in these conserved regions can have significant impacts on an organism's fitness.
The key objective of this study is to prove that the 46 DNAs found in the Genome of a person are functionally interdependent.

Methodology & Results The contents of **Figures** and **Tables** herebelow are designed to serve as evidential components of Methods & Results in the targetful strategy of this study and that is why it is entitled **Methodology & Results** hereabove.

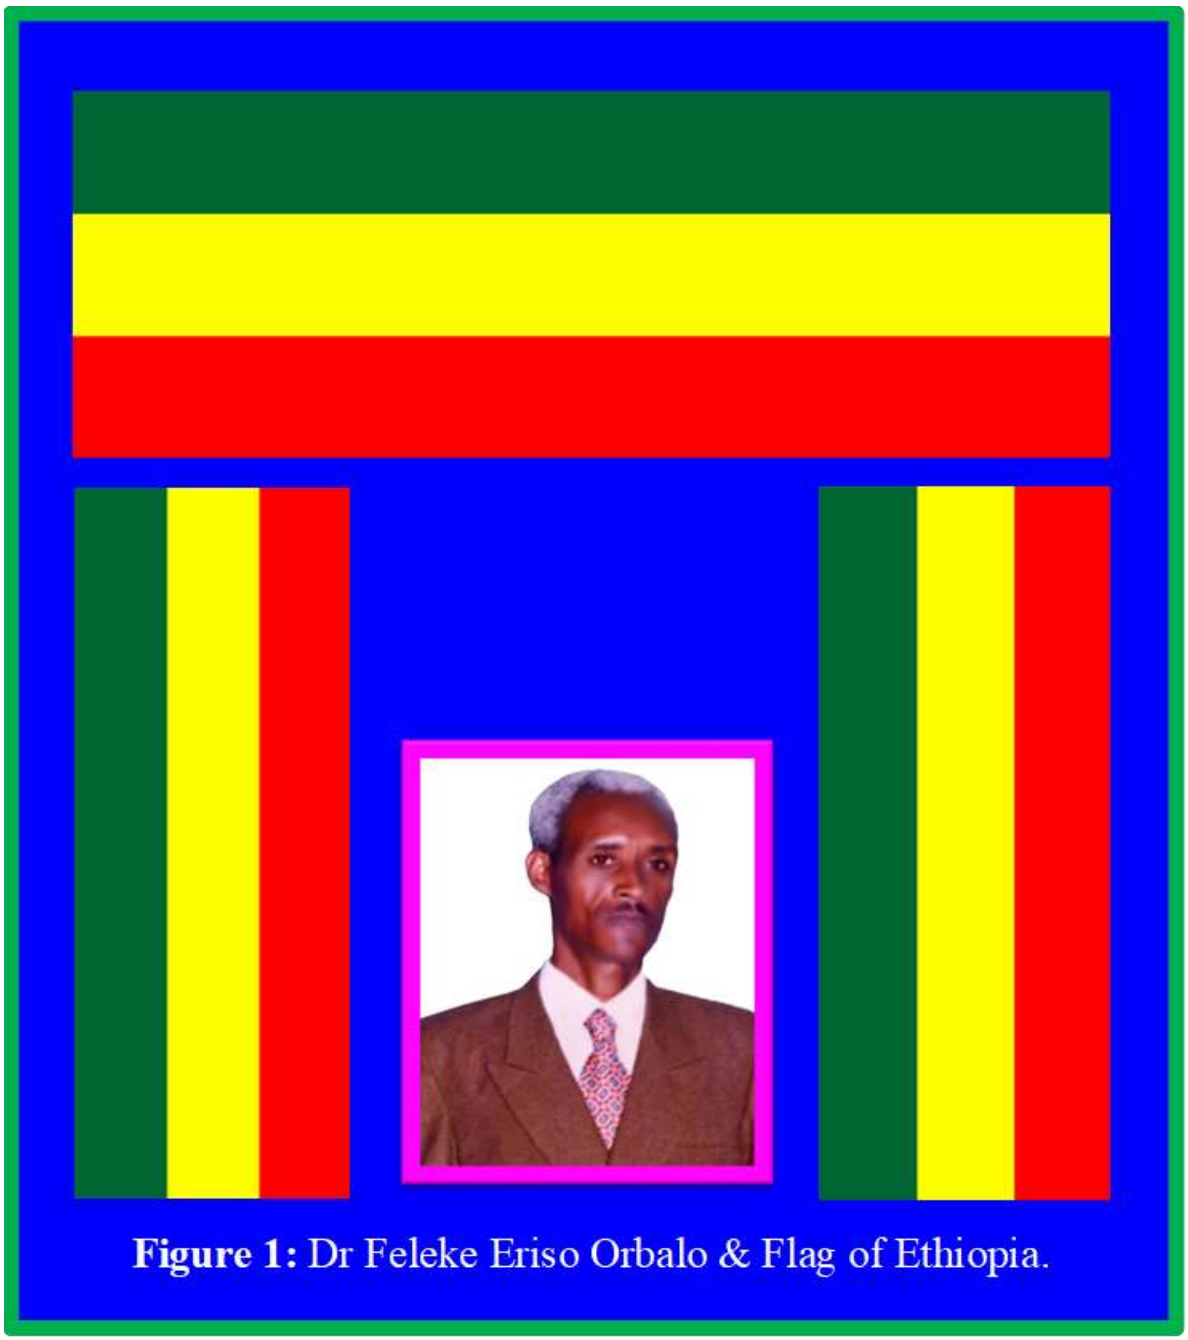

Figure 1: Dr Feleke Eriso Orbalo & Flag of Ethiopia.

Feleke Eriso Orbalo: BSc, MSc, PhD, is an **Ethiopian** human parasitologist (immunoparasitologist). He is the recognized **Father of:- Perfect Law of Genomology**,

Genomic-things, **Genomosphere**, and of many other genomological **Principles** & **Concepts** (born 24 Nov. 1962, age of 62 at present).
Feleke EO is:

►a **Global Man of Science for the Good of All Human Beings**, being a permanent and everlasting educational asset of all human races of the species *Homo sapiens*,

►the **first** scientist to forward the difference and similarity between nonalive molecules & alive molecular genomic-things (**Viroids** and **Viruses**),

►the **first** scientist who identified that **aging** in humans is an **inheritable and deadly genomic-disease**,

►the **first** scientist who demonstrated the secrets of being **immortal** or **mortal** with respect to **aging**,

►the **scientist** who created **Empire of Genomosphere** that covers 100% of Earth's land & water surfaces on which the **sun never sets**,

► the **scientist** who generated **Empire of genomological sciences** with its **Perfect Law of Genomology** contributed to all races of *Homo sapiens* known to cover 100% of **Earth's** surface on which the **sun never sets** forever (See in the genomological structured articles cascaded),

►the **first** integrator of **Genomology**, **Chemistry**, **& Physics** by way of the same language of **Universal Reactions of Matter**.

►the **first** genomologist who **found** & **brought back** the **superscience number 1** entitled**: Genomopsychology** that was **lost**, being entitled as **Psychology** and originlessly, rootlessly, or scientific-baselessly **enslaved** by Social Science in all Universities of the world,

►the **first** scientist who stated clearly the marked differences between the **inheritable baseline phenotypes** in plants or the **inheritable baseline behaviors (abilities or skills)** in humans/animals and the **noninheritable acquired component of phenotypes** due to effects of environment in plants or the **noninheritable acquired behaviors (abilities)** gained as learning outcomes in humans/animals,

►the **first** interpretor of the fact that both the **undesirable genomic changes** that result in genomic diseases and the **desirable genomic changes** in normal human genome which result in normal phenotypes in the individuals synthesized are **countably infinite** in potential number of kinds,

►the **first** genomologist to prove the fact that viruses are certainly **genomic-things**,

►the **first** genomologist who verified the best of truth with spectacular & concrete evidences about the fact that viroids are **genomic-things,**

► the **first** genomologist to verify that the **Genome**'s **coded/designed directives** are implemented by its **transcripts** & **proteins** that serve as engineers in the **metabolism** of all genomic-things,

►the **first** scientist on this planet (Earth) to define what a scientist (living-thing or genomic-thing) is. Before him, scientists didn't know themselves but they were creating other sciences,

►the **first** scientist to interpret what the actual autointracellular pathogen is in diseases of **cancer** & **diabetes mellitus type 1**,

►the **first** scientist to state the clear cut difference between the **risk factors of cancer** & the **actual causative agent** of **cancer**,

►the **first** genomologist who proved that what had been wrongly termed **therapeutic vaccines** should be totally called **adjuvants**,

►the **first** scientist to verify that **Coley's toxin** was certainly a type of **adjuvant**.

►the **first** scientist to interpret that **immune response**, **epigenetic modifications/changes**, **syndromes**, and **symptoms** observed are the evidential **supersensitive** responses of the human **Genome**,

►the **first** scientist who stated that the development of **cancer** is always **autovaccinated** with no exception,

►the **first** scientist to introduce the terms **Autovaccines** and **Autovaccination**, **Cancerous Genome**, **Autoinfection**, **Autointracellular pathogen**, and **Cancered Cells** into the sciences of **Genomology**,

►the fir**st** scientist for dismissing the erroneous term called **therapeutic vaccine**, replacing it by **therapeutic adjuvant** or synonymously by **adjuvant**,

►the **first** disqualifier & disprover of **Endosymbiotic Theory** about the origins of Mitochondrion & Chloroplast published by the authorship of **Lynn Margulis**,

►the **first** scientist who disproved "**Ganti's definition of a living-thing** (i.e., of a genomic-thing) together with the **Nonenzymatic Chemoton Model of Minimal Life**,"

►the **first** genomologist to state that **Genome** is the **unit of both structure & function** of every individual of all genomic-things by dismissing the **fake Cell Theory** which stated that **Cell** is the unit of both structure & function of every individual of all **living-things** (i.e., genomic-things),

►the **first** genomologist to state that **Genome** is the **unit of evolutionary change** of all genomic-things what was **fakely** stated that **Darwin** was the **unit of evolutionary change** of living-things,

►the **first** scientist to state that the **Genome** of cancered cells named **Cancerous Genome** is the **unit of both structure & function** of all types of autoinfected cells that form lumps of tissue including benign tumor, primary & secondary metastatic tumors, and nontumor forming cancered cells such as lymphoma, leukemia and myeloma,

►the **first** scientist to state that **Cancerous Genome** synthesizes **masses/colonies of autoinfected cells** (lumps of tissue, benign tumors, malignant & metastatic tumors, including nontumor forming cancered cells such as myeloma and leukemia), resulting in **Cancer**,

►the **first** genomologist to state that **Genome** is the only **operating/synthesizing system** in every individual of all genomic-things by disproving what had been **falsely** stated that **Darwin** was the **operating system** of living-things,

► the **first** scientist who identified the fact that the **automatic molecular machine** called **Genome** is the synthesizer of all genomic-things from viroids, viruses, bacteria up to angiosperms and humans,

►the **first** scientist who evidentially declared that chemical composition of **Genome** of all genomic-things from that of viroids, viruses and microscopic organisms up to that of angiosperms and humans is the **same being composed (built or made up) of nucleotides**,

►the **first** scientist who invented the term **Genomology**, deriving it from the term (name) of the **automatic molecular machine** called **Genome** that synthesizes itself & all species of genomic-things,

►the **first** scientist who dismissed **4** divisions of **Biology** and brought up to **6** divisions of **Genomology**,

►the **first** scientist for interpreting that the experimental reports of accurate observations by **Gregor Mendel** in **Genetics** based on **phenotype** of pea plants & that of **Benjamin Bloom** in **Educational Genomopsychology** based on **behavior** (**ability**) of human **mind** (**brain**) or pyramid **levels of learning outcomes** in human **cognitive domain** were **equivalent** to each other ruled or controlled by inheritable functional directives of **Genome**,

►the **first** scientist who has erased, wiped away, definitional confusion or ambiguity that surrounded the field of **Epigenetics** and clarified it with meaningful **concepts** & **principles** of **Genomology**,

Print ISSN: 2517-276X
Online ISSN: 2517-2778
https://bjmas.org/index.php/bjmas/index
Publication of the European Centre for Research Training and Development -UK

►the **first** scientist who created the principle of applied **Epigenome** against the inevitable **deadly aging** (what no one of human beings can escape) by the pathway of **Anti-aging** epigenetic product on **Genome**,

►the **first** scientist who clearly, spectacularly and impartively made known the fact that the **Genome**, in the complex body of a multicellular individual organism such as a person and an angiosperm, modifies itself into a variety of **Epigenomes** in order to enable itself to synthesize the individual multicellular organism by way of differentiation of stem cells into so many different specialized & functionally interdependent: **Cells**, **Tissues**, **Organs**, and **Organ systems**,

►the **first** scientist for demonstrating that **Genome's** becoming a variety of **Epigenomes** by binding epigenetic groups such as **methyl-** and **acetyl-** to DNA and/or histone protein/s of a chromatin during development by way of differentiation, showing syndromes and symptoms of diseases in genomic-things are the best indicators for the fact that **Genome is supersensitive**,

►the **first** scientist to state that the number one characteristic or one of the most important characteristics (properties) of a **Genome** is the **supersensitiveness** of:

●**itself**, and

●**molecules** (antibodies, prion, hormones, coding & noncoding transcripts, genes, enzymes, etc.) as well as the **genomic-things** synthesized by it.

►the **first** scientist who proved that **gene** is not the **unit** of both **structure** & **function** of all genomic-things, because the **unit** of both **structure** & **function** of all genomic-things is the **Genome** where the **gene** is put off or on by the functional directives of the **Genome,**

►the **first** scientist to state that **supersensitivity** of a **Genome** is inherited to**:** molecules, cells, tissues, organs, organ systems, functional (individual) organisms, and generations of the specific species synthesized by that specific **Genome**,

►the **supergreatest** scientist who **removed** the **junk** (**Biology**) from & **added accuracy** (**Genomology**) to the world of **Natural Sciences**,

►the **Father** of all scientists of all sciences of this planet (Earth) with no chance for exception,

►the **Father** of the **Perfect Law of Genomology**,

►the **Father** of **Genome Model**,

►the **Father** of **genomic-things**,

►the **Father** of **Genomopsychology**,

Print ISSN: 2517-276X
Online ISSN: 2517-2778
https://bjmas.org/index.php/bjmas/index
Publication of the European Centre for Research Training and Development -UK

►the **Father** of **Genomopsychiatry**,

►the **Father** of **genomosphere** that is in sunlight the whole 24 Hrs as the sun rises & sets on the genomosphere,

►the **Father** of nonstopping automatic generations of **genomic reactions** in every species of all genomic-things from viroids, viruses, bacteria up to angiosperms and humans,

►the **Father** of **superscience** (science of nonstopping automatic genomic reactions for countably infinite number of generations),

►the **Father** of **Septupled Empires** of **Genomology**,

►the **universal omniscient** in dismissing **fake sciences of Biology** & in generating correct sciences of **Genomology** defined as the study of genomic-things,

►one of the **Unique Educational Assets** of all human races of this planet that money cannot buy,

►the Superpower in **Power of Mind in Genomological Sciences** in the entire world with no rival & claimer forever, and

►the **Supergreatest Scientist among all the Greatest Experimental and Theoretical Scientists** known in the entire world at present & in all future time of human history to come. In summary, **Feleke EO** is the **Supergreatest scientist among all the Greatests** in the **Global Scientific Community** of the entire world forever [41 Articles of the **Global Textbook of Genomology**].

Note: **Genomopsychology** is the scientific study of the human **mind** (**brain**) & its function that affects **behavior** the creation of which is predetermined by the differentiative & functional directives of the **Genome** of *Homo sapiens*. Behavior of genomic-things is inheritable because **Genome** is inherited and can be improved, enhanced, or increased in ability (in levels of **understanding** & in orders of **thinking skills**) by way of **learning.** Example, **Pavlov's** experiment on dogs' salivation using presentation of food. In genomopsychological context, the term **behavior** = knowledge; skill; ability; expertise; and other synonyms. Not only **Biology** is dismissed and replaced by **Genomology**, **Psychology** is also dismissed irreversibly and replaced by **Genomopsychology**, because of the scientific originlessness or rootlessness of the term **Psychology**. Remember the fact that human **mind** (**brain**) with its characteristic baseline ability called **behavior** is synthesized by human **Genome**. The branch of **Genomopsychology** applied in medical practice is called **Genomopsychiatry**.

Acknowledgements

I am deeply grateful to scientists acknowledged in the text and list of references of this paper for their providing me with confidential data that can be counterchecked, for their correctness, with observable facts in the natural environment as well as with truths in reputable journals, and Internet. This is so because science cannot develop without science. I am really thankful to authors of musical art & musicians for their carefully following and transforming my published articles of genomological sciences into musical films. I am very strongly thankful to those global scientific communities for their genuinely following my task of performing to establish the sciences of Genomology and for their authentic thanking me by way of emails for what I have contributed to the scientific world of Genomology.

Francis Crick, Murice Wilkins, Rosalind Franklin, Toole G, Toole S, Michael Faraday, Edward Genner, Frederick William Twort, Charles Babbage, Sir Isaac Newton, William Harvey, Thomas Hodgkin, James Parkinson, Waddington CH, Sir William Bowman, John Bertrand Gurdon, Ivan Wilmut of UK; James Watson, William B Coley, Stanely B Prusiner, David Baltimore, Bejamin S. Bloom, Alexander Graham Bell, Thomas Edison, James Thomson, Joe Hin Tjio of USA; Shinya Yamanaka, Kazutoshi Takahashi of Japan; Ivanovsky Dmitri, Ivan Petrovich Pavlov of Russia; Albert Einstein, Alois Alzheimer of Germany; Guglielmo Marconi, Marcello Malpighi of Italy; Antoine Lavoisier of France; Gregor Mendel of Austria; Antonie Van Leeuwanhoek of Netherlands; John Friedrich Miescher of Switzerland; and Jules T Freund, Imre Festetics of Hungary are the Global Teachers who taught Father of the Perfect Law of Genomology. Thus, the Father of Perfect Law of Genomology is Proud of & he is also the Pride of his Global Teachers, because the purpose of teaching is to capacitate students to solve problems that had been said and believed impossible by the previous generations of human races. I became the Supergreatest Scientist in the world by learning from the famous and inspiring bests & greatests among the scientists of the world. In other words, Greatest Global Teachers of Science produced the Supergreatest Scientist who is me. This is so because the key objective of Teaching & Learning is to make Students More Powerful than the Teacher in Novel, Academic, and All Rounded Productive Achievements; otherwise, there would be no point in the profession of teaching!!!! Profession of Teaching is the Parent Profession of All Professions known on Earth. The concreted evidence for the Greatestness of Global Teachers of Science who taught Feleke Eriso Orbalo, is Feleke's being the:

►Supergreatest Scientist,

►Generator of **sextupled structural components (Empires) of Genomology**, and

►Father of the **Perfect Law of Genomology**.

To the best of my knowledge, **I Feleke EO** declare that **Love & Respect** I have for my:

►**Educational Parents** (Global Teachers of Science who taught me), and

►**Genomological Parents** (my father & my mother)

are exactly the same (**Equational**).
