ABSTRACT: *In this paper, we ask why is there evil in the universe? The answer is that it is the very fact that there is a universe necessitates evil. It is the tension created between pure goodness and pure evil that leads to a universe of Energy=-1. We provide the calculations form Astrotheology to show that this is the case.*

KEYWORDS: Devil, evil, astrotheologym, God

INTRODUCTION

Many non-believers ask the question: If God is all good, then why is there evil in the world? Why did He create the Devil? The answer lies in Astrotheology.

Linear Algebra tells us that the Zero Vector (Z) is perpendicular to itself viz the dot product. This means that when time $t=0$, $E=-1$ lies on the perpendicular Cartesian plane. The Golden Mean Parabola (GMP) is $E=-1$ when $t=0$. Mass is created until $t=1/2$ and $E=Emi=-.125$

There is a tension between Energy and time. That's why they are perpendicular to each other. If we consider that Evil is represented by 0.666 and God as 0.333, we have

$333/666=1/2=t$ Implies GMP

$E=-.125 +(-1)=-/25=9/4=c^2/M=444$

$444 \times M=444 \times 4=1.777=Work=c^2$

$C=\sqrt{1.777}=1.333=space\ s$

$C=sd/t=s/t=s$

$t=1$

Mass $M=Ln t$

$M=Ln 1=0$ Beginning of Mass in the universe. Why is there something rather than nothing? Because the $Z =0$ is perpendicular to itself. If you have nothing, it pops into something immediately.

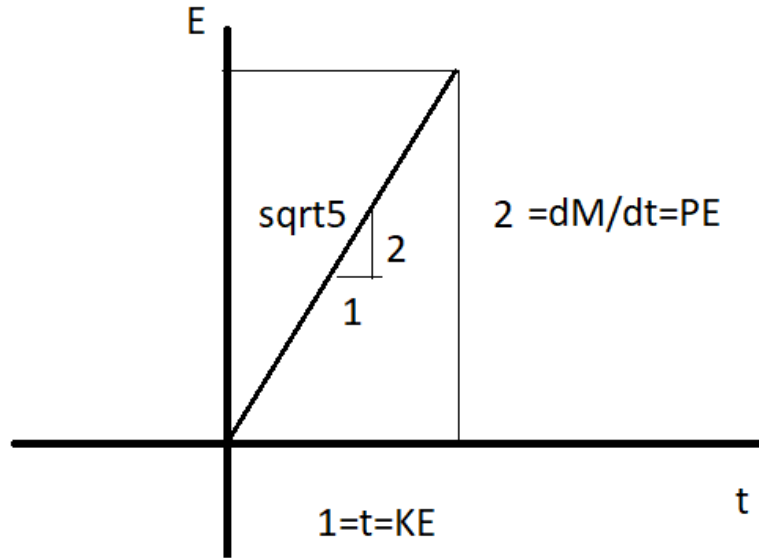

God had no choice but to exist. It is a characteristic of the zero vector; not because it is a property of a perfect being. Therefore, God told Moses His name is "I AM" I Exist.

Against Hobbes, they (the virtuosi) maintained that the universe is the product of intelligent purpose, not of blind chance. Against Leibniz, they maintained that creation was an act of God's will and freedom, not of rational necessity. Against Spinoza they maintained that God is separate from the world and external to it, not identical with the nexus of inexorable law. [1] pg 43

We've already shown in a previous paper that the universe is telescopic toward existence. We've already shown that Creation is not an act but an automatic process. No Creator is necessary so long as we have energy (or negative energy). God is one with the universe: pantheism. *In Him we live and move and have our being. Acts 17:28~sqrt3*

Robert Boyle: Laws are the instruments through which he governs, and he violates them "very rarely." [1] p41

Now,

$y=mx + m^2$

$y=y'x + (y')^2$

$2=y'(1) + (y')^2$

$y'^2 + y' - 2 = 0$

Whitehead: He[God] is not before all Creation, but with all Creation. [1]

I'm Catholic by birth and formerly, by practice. I believe that the era of the Church is over as I declared upon the General Judgement of Mankind. Am I a Diest? Am I a pantheist? I certainly believe God exists. He intervenes rarely, but He does intervene occasionally. I've experience Biblical Prophecy, and personal prophecy. But I know that universe was not created by God's will. It had to exist. There was no choice. Amit function mainly upon Laws that can be broken from time to time. What comes next for the world I do not know. The General Judgement is over. The Church is finished. Time for something new. There is supposed to be a `1000-year Messanic era where the Devil is chained and powerless before he is released for a "little while" according to the book of Revelation.

CONCLUSION

Where many scientists fail is in not accepting observations they can't repeat in a lab. If that is all they'll accept, they can't raise to the level of asking big questions that are not subject to repeatable experimentation. Can they even ask, how did the universe come to exist?
