ABSTRACT: **Cancer** is one of the types of genomic diseases. It is caused by pathogenic mutation in the **Genome** inside a cell so that the cell can be activated to divide & grow uncontrollably. The key objective of this study is to verify that the actual causative agent of the disease **cancer** is the pathogenic mutation in **Genome**. The contents of Figures displayed are designed to serve as Results in the targetful strategy of this study. The actual causative agent of **cancer** and the precancerous effects of **risk factors of cancer** are identified and made available in order to have strong conclusive statements. **Cancer** occurs if and only if **Cancerous Genome** synthesizes enormous number of **autoinfected (cancered) cells** rapidly by way of apoptosisless and uncontrolled growth of **cancered cells** involving fast cell division, using **its chemical energy-containing nutrients** as raw materials; otherwise, none of the precancerous effects of **risk factors of cancer** can cause the occurrence of **cancer**.

INTRODUCTION

Cancer is one of the types of genomic diseases [1-9]. It is caused by **pathogenic mutation** or change in the **Genome** inside a cell so that the cell can be activated to divide & grow uncontrollably. Such abnormal or damaged cells grow and multiply when they should not, forming **tumors** which are **lumps of tissue (mass of autoinfected cells)**. Tumors can be benign (not cancerous) or malignant (cancerous). Benign tumors do not spread to invade nearby tissues or organs. After surgical removal, benign tumors do not grow back whereas cancerous tumors do sometimes. Sometimes, benign tumors can be very large and life threatening such as the benign tumor in the brain.

The pathogenic mutation (change) in the **Genome** appear to affect three main types of genes:- proto-oncogenes, tumor suppressor genes, and DNA repair genes. Sometimes, these changes in **Genome** are called **drivers** of **cancer**. The spread of a **cancer** from the place where it first formed to another place in the body is called **metastasis**. It must be noted that not all **cancers** form tumors. Some types of **cancer** that do not form tumors include leukemias (**cancers** of blood), most types of lymphoma (**cancers** of lymphocytes), and myeloma (a type of white blood cell **cancer** that develops from **plasma cells** in bone marrow). Remember that B cells refer to lymphocytes that are not processed by the thymus gland, and responsible for producing antibodies while plasma cells refer to fully differentiated B-lymphocyte, which produces a single type of antibody.

The key objective of this study is to verify that the actual causative agent of the disease **cancer** is only the pathogenic change in **Genome**. In short, it is to show that **cancer** is caused only by pathogenic mutation in **Genome**.

METHODOLOGY AND RESULTS

DISCUSSION

As there is distinctive individuality among people of the same species (*Homo sapiens*), there is the corresponding distinctive individuality among the **Genomes** found in the populations of *H. sapiens*. In fact, it is the distinctive individuality or variation in both **structure & function** among **Genomes** found in individuals of *H. sapiens* that result in distinctive individuality (identifiable phenotype) among human populations. It is this similar variation or change in **Genome** where an undesirably drastic & strong change (or mutation) in the **Genome** result in **Cancer**. It is the change in **Genome**, depending on the extent and type of change in all genomic-things that brings about:

- ▶ distinctive individuality,
- ▶ **Cancer**,
- ▶ evolutionary change, etc [21-22].

Fake sciences of Biology have dangerously misled students and confused scientists in working out the difference between **risk factors of cancer** and the actual causative agent of **cancers**. The effect of anyone **risk factor of cancer** is limited to **precancerous change** whereas the actual causative agent of **cancer** is found in the cancerous genomic reactions, being the pathogen that causes the disease **cancer** just like the pathogens in infectious diseases. It is because of the misleading and confusing effects of **fake sciences of Biology** (mentioned above) that the consciousness of the public about **cancers** is polluted by **myths** (false beliefs & ideas). A **risk factor of cancer** is anything that may increase a person's chance of developing cancer by making the body less resistant or by decreasing immunological resistance to it in the **precancerous change**, but it does not necessarily cause **cancer**. The actual causative agent of **cancer** is the autogenous pathogenic **Genome** known as a **Cancerous Genome**. **Cancer** occurs if and only if **Cancerous Genome** synthesizes enormous number of **autoinfected (cancered) cells** rapidly by way of apoptosisless and uncontrolled growth of these cancered cells together with fast cell division, using **its chemical energy-containing nutrients** as raw materials where none of the **risk factors of cancer** is involved in this cancerous set of mechanisms of genomic reactions [23, 24].

CONCLUSION

Cancerous genomes in humans are autointracellular pathogens that cause **cancers**, being similar to intracellular pathogenic **viroids** in plants and intracellular pathogenic **viruses** in animals & plants. It is because both **cancerous genomes** & **viruses** are nonself foreign intracellular pathogens that the cells infected by them in the body of a person are detected and destroyed **by the same immune cells** (Natural Killer Cells & Cytotoxic T Cells) & **by the same mechanism** in favor of the patient.

Cancer is the disease caused by becoming or changing of **Genome** into a nonself autointracellular **pathogen**.

Cancer is a genomic disease (caused by genomic disorder, undesirable change in **Genome**, i.e., by undesirable change in the **unit of both structure & function** of a person or genomic-thing).

Cancer is a result of wrong synthesis of genomic-thing by wrong procedures (algorithm) of the synthesizer **Genome** referred to as **Cancerous Genome**. In other words, **cancer** is brought about only by its **Cancerous Genome** which can **synthesize** several **lumps of tissue (benign tumors, malignant & metastatic tumors, or nontumor autoinfected cells)** that spread via bloodstream and lymphatic system so as to invade different tissues & organs in different sites of the patient's body. It must be noted that the **Cancerous Genome** uses **its nutritive substances**

(just like normal **Genomes**) as raw materials to synthesize unlimited **masses of cancered cells (autoinfected cells)**.

The clear cut difference between **risk factors of cancer** and the **cause of cancer**:

► **Cancer** can be caused or synthesized only by its specific **Cancerous Genome** and not by any kind of **risk factors of cancer**.

► Any kind of **risk factor of cancer** can only or may increase the chance of developing undesirable change in the precancerous change such as decreasing immunological resistance, increasing susceptibility (vulnerability), to develop the disease or a pathogenic mutation in **Genome**, but cannot synthesize **masses of autoinfected cells & itself** so as to result in **cancer** by any means in any kind of cell.

Cancer exists if and only if its specific **Cancerous Genome** exists. It is only the **Cancerous Genome** that synthesizes **masses of autoinfected cells** and causes **cancer**. On the other hand, the misleading **fake sciences of Biology** state that, in all journals of Oncology, textbooks, and on Internet, all **risk factors of cancer** such as tobacco, tanning, diet, alcohol, inflammatory condition, lack of physical activity, exposure to air pollution, and oncoviruses do cause **cancer** by synthesizing **masses of autoinfected cells** what is absolutely wrong. It must be noted that the effects of **risk factors of cancer** is completely limited to precancerous change on **Genome**. This is so because the only actual causative agent of **cancer** that always, permanently, and inseparably exists with the existence of **cancer** is its **Cancerous Genome**. You cannot think of **cancer** in the absence of its **Cancerous Genome** (the pathogen that causes **cancer**), but none of **risk factors of cancer** is involved, seen, or exists in the process of cancerous change with uncontrolled growth & cell division of **autoinfected cells (cancered cells)**. No **Cancerous Genome** means no uncontrolled rapid growth & cell division of **autoinfected cells** in genomic-things and there would be no **cancer** in nature.

Cancer occurs if and only if **Cancerous Genome** synthesizes enormous number of **autoinfected (cancered) cells** rapidly by way of apoptosisless and uncontrolled growth of **cancered cells** involving fast cell division, using **its chemical energy-containing nutrients** as raw materials; otherwise, none of the precancerous effects of **risk factors of cancer** can cause the occurrence of **cancer**.

At this moment, the scientists' understanding about the real scientific truth (events) of **cancer** is simply **beating around the bush** because they didn't get the clear cut difference between the **risk factors of cancer** and the **actual causative agent of cancer**. They inappropriately

consider the **actual causative agent of cancer** (i.e., the **Cancerous Genome** inside its cancered cell) as one of the **risk factors of cancer** and then they dare to lie (bubble) or to say erroneously that **risk factors of cancer** cause **Cancer**. This is a dangerous misleading concept, mixing the **actual causative agent of cancer** with **risk factors of cancer**. The **risk factors of cancer** may decrease the immunological resistance of a person, increase the chance of developing the disease in the precancerous change of healthy cells, but are not the actual causative agent of **cancer** somewhat analogous to the fact that a horse takes a heroic fighter to the battling field but does not make any actual deadly attack on the enemy fighters. Similarly, for each specific type of infectious diseases, its risk factors are completely different from its actual causative agent (pathogen). In short, a risk factor of cancer is anything that may increase a person's chance of developing cancer by making the body less resistant to it, but does not necessarily cause **cancer**.

All kinds of change in **Genome** cannot cause **cancer**. **The major changes in Genome** brought about mainly by erroneous changes (mutations) in:- proto-oncogenes, tumor suppressor genes (anti-oncogenes), and mismatch-repair genes (DNA repair genes) can cause **cancer** whereas **all other undesirable changes in Genome** cause all other kinds of genomic diseases or genomic disorders [9].

It is true & accurate to state that causing **undesirable change in Genome** and causing **cancer** are two completely different concepts, principles or pathways.

Both **cancer** (genomic disorder) & all other noncancer genomic disorders are definitely or accurately genomic diseases caused by **undesirable changes in Genome**, but the **undesirable changes in Genome** which cause **cancer** are completely different from those that cause all other noncancer genomic diseases (i.e., genomic disorders).

The term **cancerous cell** found in biological sciences is one of the **spectacular & concrete evidences** for the **misleading fakeness of biological sciences**.

A **cancered cell** is an **autoinfected cell** by its own **cancerously pathogenic Genome** that has become nonself or foreign by way of pathogenic mutation.

Interpreting in a patient of **cancer**, an **autoinfected (cancered) cell** is a complete & different individual organism that resides as a **pathogenic parasite** in a human host with its own selfsufficient **Genome** different from that of the patient.

A **cancered (autoinfected) cell** & a **cell infected with a virus** are identified (using sample peptides/proteins of the pathogens that are displayed on surfaces of the infected cells with

MHC to identify foreignness or nonselfness) by detective immune cells to attack and destroy by similar mechanisms because both the **cancerous Genome** in the cancered or autoinfected cell & the **virus** in the infected cell are foreign **intracellular pathogens** whose characteristic nonself peptides/proteins, i.e., nonself antigens are displayed by MHC complex on surfaces of the infected cells for discriminating nonself from self.

Among genomic-things, the main **pathogens** encountered are:

- ▶ **Cancerous Genomes** in autoinfected cells,
- ▶ **Viroids** in plants,
- ▶ **Viruses**,
- ▶ those of **bacteria**,
- ▶ **Parasites**, and
- ▶ those of **fungi**.

At present, the detailed understanding about **cancer** of:

- ▶ **Genomologist** or **Biologist**,
- ▶ oncologist,
- ▶ specialist of **cancer**,
- ▶ surgeon who surgically removes **malignant tumors** from patients, or
- ▶ medical doctor

is obviously **blurred**. Again it is not clearly stated about what synthesizes the Benign Tumors & Autoinfected Masses of Cancered Cells as well as what the raw materials are for synthesizing these autoinfected cells in their apoptosisless (deathless) & continuous growth in both size and number not to contradict with the **Law of Conservation of Matter**. These events managed to happen because the student children or scientists have been misled or confused by **fake sciences of Biology**. This spectacular event is one of the big concrete evidences for the fact that **fake sciences of Biology** have been paralyzing the scientific progress of student children of all human races of the entire world for several centuries.

The **Perfect Law of Genomology** which states that **Genome** is the **unit** of both **structure** & **function** in every individual of all genomic-things is a type of scientific law that will never be

outdated, existing (valid & accurate) forever with the scientific world of human races wherever/whenever they exist.

The **Perfect Law of Genomology** also states that **Genome** is the **unit of evolutionary change**.

The **Perfect Law of Genomology** again states that **Genome (Pathogenic Genome or Cancerous Genome)** is the **unit of both structure & function of Masses of Autoinfected Cells (lumps of tissue, benign tumor, primary & secondary metastatic tumors including nontumor forming cancered cells)**, causing or resulting in **cancer**. Look! A type of tumor (a mass of cancered cells) such as that causes a **breast cancer** is an **individual genomic-thing** that is pathogenic & invasive in the body of the patient (host) just like an intracellular pathogenic bacterium, a virus, or it is an individual complete organism like an individual person such as **Kebede, David, Mohamed, Zeberga, and Arega Semaga** where each of these individuals has its/his own synthesizer **Genome** which can be a **Normal Genome** or a **Cancerous Genome**. Being **cancered** can & does start in any one of the trillion of cells in our bodies.

Optionally, **cancered (autoinfected) cells** can be called **autogenous single-celled parasites** that may form lumps of tissue or colonies of its parasitic cells (i.e., benign tumor or malignant & metastatic tumors as well as nontumor forming cancered cells such as myeloma and leukemia) in tissues and organs they invade, outcompeting for nutrients & space with their apoptosisless rapid growth of these cancered cells involving fast cell division.

A **cancered cell** is a nonself, foreign & pathogenic organism in the body of its host (patient). This is the reason for why **Natural Killer Cells** and **Cytotoxic T Cells** detect and destroy, autoinfected (cancered) cells & cells infected with virus, similarly and by the same mechanisms of immune response in bodies of patients. A type of **cancer** is created by **pathogenic mutation** in the **Genome** of any one cell of its host.

As it has already been stated herebefore, a **Genomic-thing is defined as the product of reactions of its:**

► **Genome & its nutritive substances and minerals using sunlight-energy in the presence of chlorophylls as raw materials in its compatible environment** (in autotrophs or green plants), or

► **Genome & its chemical energy-containing nutritive substances and minerals in its compatible environment** (in heterotrophs).

In other words, the **Genome** synthesizes itself and every individual genomic-thing of its kind using **sunlight-energy & its nutritive substances and minerals in its compatible environment** (autotrophs), or the **Genome** synthesizes itself and every individual genomic-thing of its kind using **its chemical energy-containing nutritive substances and minerals in its compatible environment** (heterotrophs).

In short and based on the **Perfect Law of Genomology**, **Genome** is the **unit** of:

- ▶ both **structure & function** of all genomic-things,
- ▶ **evolutionary change**, and
- ▶ both **structure & function** of all types of autoinfected (cancered) cells that result in kinds of **cancer** with uncontrolled growth and cell division.

It is proved & concluded that **Biology** is a **set of fake (false) sciences** whereas **Genomology** is the **set of true sciences**.

Based on the universal reactions of matter, reupdated confirmation with the best of truth:

- ▶ Superpower in **Best Controlled Quality Education** & in **Best Quality Reputable Journals** in the entire world is **UK** at present (with the publication fee being minimized down to £25 GBP in favor of global progress/development of science & technology),
- ▶ Superpower in **Medical & Agricultural Sciences** in the entire world is **India** at present,

Genomology is a **Giant Ethiopian Science** of educational asset contributed to all human races of the world by dismissing **fake sciences of Biology** that have been paralyzing scientific progresses of student children as well as MSc & PhD students of all human races of this planet (Earth) for centuries.

Genomology consists of:

- ▶ **pure genomology**,
- ▶ **genomotechnology**,
- ▶ **medical sciences**, flourishing from Genomology, and
- ▶ **agricultural sciences**, flourishing from Genomology.

Genomology is a set of **supersciences** because:

- ▶ the automatic molecular machine called **Genome** that synthesizes all genomic-things is found in the system of **Genomology** only,
- ▶ the scientist himself who creates all sciences is synthesized by self-acting (automatic) genomic reactions only,
- ▶ out of the three types of **Universal Reactions of Matter**, the automatic reaction without the involvement of **human hands & minds** is only that of **Genomology**, and
- ▶ its automatic genomic reactions are miraculously complex.

Declarative Messages from the Father of Genomology/Genomosphere	
1st	<p>To: <u>Student Children/MSc or PhD Students of all human races of the entire world</u> Dear Beloved Student Children & University Candidates! ▶ Say, no to being taught fake sciences of Biology! ▶ Boycott attending classes of Biology, because sciences of Biology are fake or false and instead demand to be taught true sciences of Genomology. ▶ Say, no to slavery by the paralyzer fake sciences of Biology! ▶ Appeal the case to Global Science Forum in a peaceful & civilized manner. I wish you all the best!!!!</p>
2nd	<p>To: <u>Genomologists (Superscientists) of the world</u> Dear Genomologists! Please: ▶ Stop forcing student children or university candidates to learn Biology. ▶ Stop teaching them fake sciences of Biology, and instead demand to teach them true sciences of Genomology because Global Textbooks of Genomology are made ready and standardized for all levels of academic study with the Curriculum composed of 23 different research articles published in globally distinguished top reputable journals. ▶ Appeal the case to Global Science Forum in a peaceful & civilized manner.</p>

3 rd	<p>To: Biologists & Professionals in applied fields of Biology in the entire world</p> <p>Dear Biologists & Professionals!</p> <p>▶ Please abandon Biology and update your scientific consciousness with Genomology.</p> <p>▶ Era of Genomology has been declared as of now by dismissing fake sciences of Biology from the world of Natural Sciences.</p> <p>Thanks!</p> <p>Dr. Feleke Eriso Father of Genomology/Genomosphere, Email: feleke.eriso@yahoo.com</p> <p>Video 1: Top 25 Mike Tyson Greatest Knockouts That Will Never Be Forgotten Highlights Full HD</p> <p>Video 2: AG brothers – haleha – new ethiopian music</p> <p>Video 3: Ashenafi Abebe – Eri Bekentu</p> <p>Video 4: Demeke Bitew - Ere Emama Zenebu ኧረ እግግ ዘነቡ - New Ethiopian Music 2021</p> <p>★ Genome is the only automatic molecular machine that synthesizes all genomic-things & itself including you & me!!!!</p> <p>▶ Despite this ascertained, spectacular and concreted best of truth, the set of fake sciences of Biology & liars enslaved by it absurdly dared to state that 98% of human Genome is junk DNA [13]!!!!</p>
