ABSTRACT: A genomological virus is a genomic-thing that possesses **Genome** which is an automatic molecular machine capable of self-replicating and synthesizing all individuals of its species using **its nutritive substances as raw materials in its compatible environment** whereas a computer virus is a nongenomic-thing being a man-made (written) malicious program. In computing, a **program** also known as **application** or **software**, is a set of instructions that processes **input**, manipulate data and **outputs** a result. The key objective of this study is to demonstrate that the genomological & computer viruses are totally unrelated and their analogic similarities are only metaphoric. The contents of Figures & Table 1 are designed to serve as Results in the targetful strategy of this study. Genomological viruses & computer viruses are not related homologically, genomically or evolutionally. The term replication (a type of reproduction in **Microgenomology**) is not appropriate to use for computer viruses as it is used only in microgenomology and molecular genomology. Cyber security can be 100% efficient if and only if attacks by black hat hackers & unethical grey hat hackers are prevented 100%.

KEY WORDS: Genome, Computer virus, Hacker, Internet, Genomological virus, Cyber security, Program, Software, Malicious

INTRODUCTION

A genomological virus is a genomic-thing that possesses **Genome** which is an automatic molecular machine capable of self-replicating and synthesizing all individuals of its species using **its nutritive substances** as raw materials in **its compatible environment** [1-19] whereas a computer virus is a nongenomic-thing being a man-made malicious program. In computing, a **program** also known as **application** or **software**, is a set of instructions that processes **input**, manipulate data and **outputs** a result [21, 22]. Examples of computer **Program** include: - Adobe Photoshop, Anti-

Virus, and a browser. A browser is a program that instructs the computer how to visit, display, and navigate a web page. Without a browser program, the computer would not be able to browse the Internet.

Cyber security is the practice to defend internet – connected systems, such as hardware, software, programs, and data from damage, from malicious attacks, unauthorized access. Its aim is to prevent cybercriminals from gaining access to data, systems, or networks. Cyber security is a broad subject that includes many security mechanisms, such as data security, ethical hacking, and digital forensics. Hacking is referred to as the illegal or legal practices of accessing data stored in any system by experts. These experts are known as Hackers. Hackers have all skills related to programming and its concepts. The mistakes that are made by programmers while generating a software are picked up by hackers to encroach the security framework of the software. Types of hackers can be summarized namely: - Black hat hackers, White hat hackers, and Grey hat hackers. The aims of black hat hachers are: - to steal valuable information from another user, to gain through transaction, to get access to free music and videos, to download hacking software for free, to steal valuable information from military/navy organizations etc, and to access restricted networking spaces. Types of black hat hackers are:

- ▶ Phreakers – Hackers who hack telephone networks.
- ▶ Crackers – Hackers who remove the security wall of software by using software patches.
- ▶ Carders – Hackers who attack ATM or credit cards to retrieve user information.
- ▶ Script Kiddies – Hackers who want to attack computer systems for no purpose.

The objectives of white hat hackers are: - to improve the security framework in a system, to develop high security programming language like Linux, to develop most of the security software for free, to check and update security software, to develop programs like pop up blocker, firewall, and ad blocker. White hat hackers are referred to as ethical hackers whereas black hat hackers are termed unethical hackers.

The Grey hat (or Gray hat) hacker is a computer hacker or computer security expert who may sometimes violate laws of ethical hacker standards, but usually does not have the malicious intention typical of a black hat hacker [21, 22].

The key objective of this study is to demonstrate that the genomological & computer viruses are totally unrelated and their analogic similarities are only metaphoric.

METHODOLOGY & RESULTS

The statements written within each serial number of **Table 1** herebelow, are concrete & published evidences for the fact that **genomological** & computer viruses have only analogic similarities which can also be put as **metaphoric similarities**. With this in mind, the contents of **Figures** & those of **Table 1** herebelow are designed to serve as Results in the targetful strategy of this study and that is why it is entitled **Methodology & Results** hereabove.

1. Charles Babbage

2. Fred Cohen

Figure 1: Photos of two computer scientists.

1. **Charles Babbage** was a **British** scientist, being the **pioneer** of computer science (born 26 Dec.1791 and died 18 Oct. 1871).

2. **Fred Cohen** was an **American** computer scientist who invented the term “**computer virus**” (born 1945 and died 16 Jan. 2022).

Figure 1: Analogic or methaphoric similarities between genomological & computer viruses.

Serial No.	Genomological Virus	Computer Virus
1	Have specific targets for infection (host cells)	have specific targets for infection (computer files)
2	Virus contains genomic/genetic code that can be transcribed and translated in the host cell	Virus contains code that can be executed by computer
3	Virus & host use the same language (genomic/genetic code)	Virus & host use the same software language

4	Virus has small genome relative to host genome	Virus has small size relative to host software
5	Infectivity: spreads to other hosts	Infectivity: spreads to other computers
6	Initially infected cell is functional	Initially infected file is functional
7	Host organism does not immediately notice infection	User does not immediately notice infection
8	Not every type of cell is infected	Software can be made immune to infection
9	Different species, families of viruses exist	Different types (groups) of viruses exist
10	Immune system of host (animals, plants, bacteria), etc.	Anti-virus software on computer, etc

Figure 2: Framework of Internet network connections.

Figure 3: Types of energy used in different types of system and activity, available online.

Connect your computer to Internet. Steps of opening the video: Select, copy and paste the title of the video (only the blue colored & underlined) on Google search space on your computer desktop screen and then press Enter Key of your computer keyboard. Click Video. Now, click the slide with the correct Title of video you pasted because when the video is copied & pasted, several other unwanted videos will appear together. When video 1 ends playing, repeat the same steps for playing of video 2 and then that of video 3, etc.

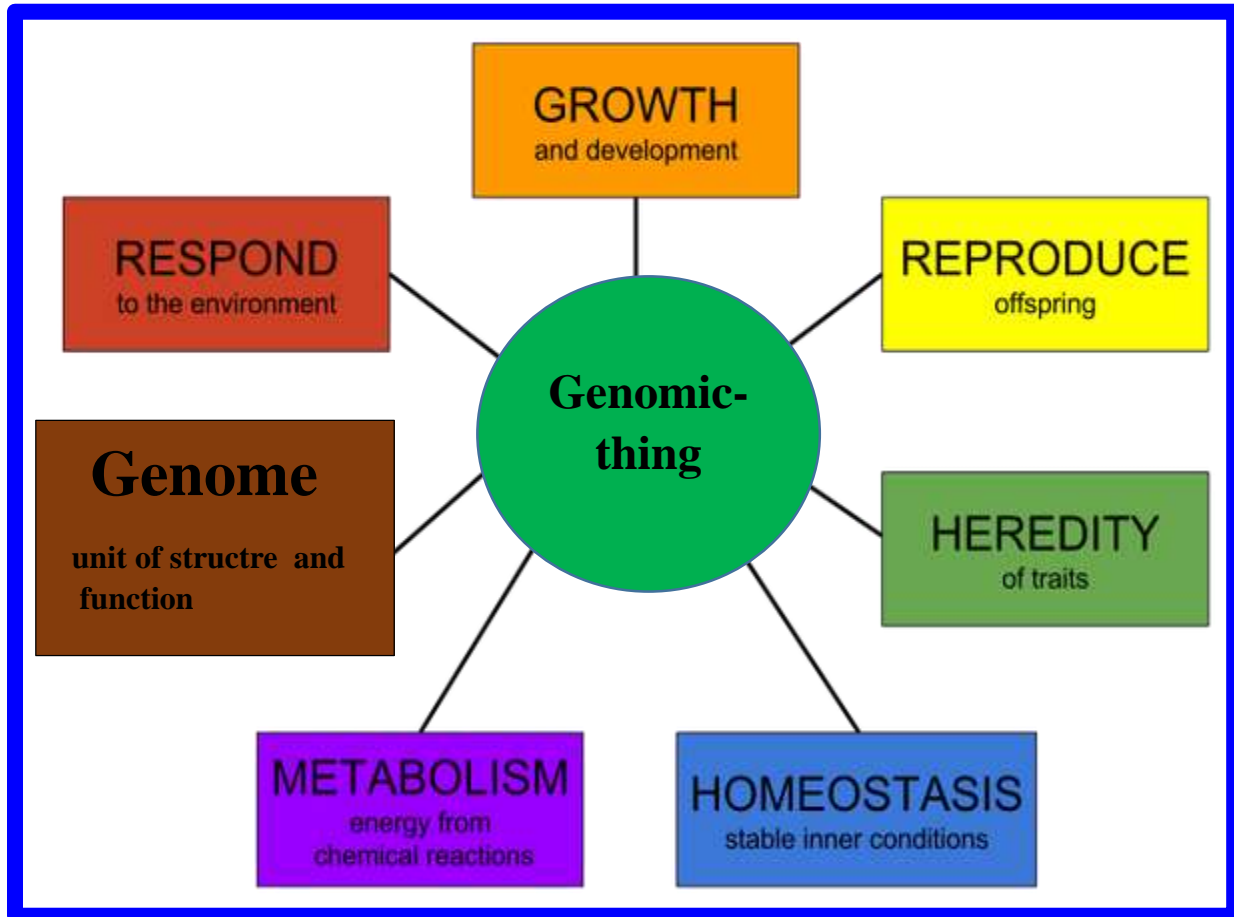

Figure 5: The main seven characteristics of genomic-things [2-19].

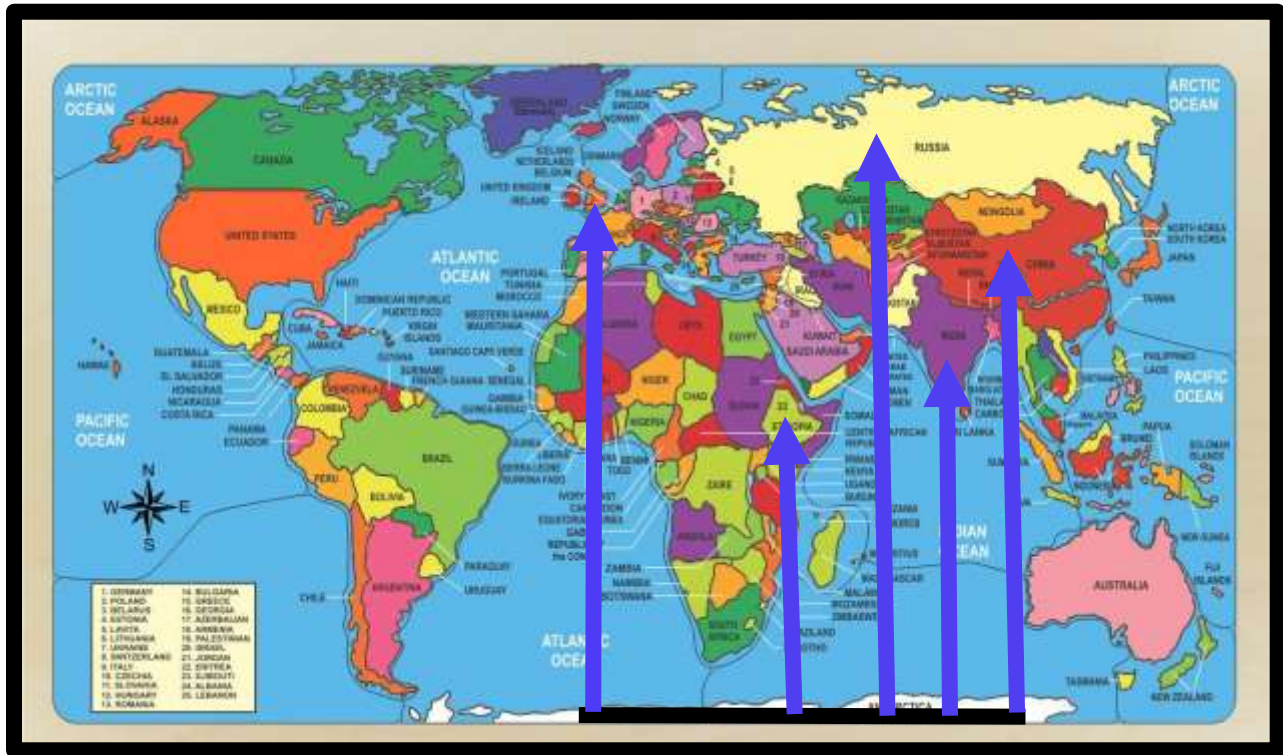

Figure 6: Map of the world with arrows showing the 5 countries (**Great Britain, India, China, Russia & Ethiopia**) where each of them is the highest or superpower in the aspects mentioned in the **Conclusion Section** of this paper.

DISCUSSION

Genomological viruses & computer viruses are totally unrelated things. Genomological viruses are genomic-things (Fig. 5) whereas computer viruses are nongenomic-things. In other words, genomological viruses & computer viruses are not related homologically, genomically, or evolutionally. Their similarities displayed in Table 1, are only analogical or metaphoric.

Cyber security can be 100% efficient if and only if attacks by black hat hackers & unethical grey hat hackers are prevented 100%.

All types of energy are categorized into two main **forms**, namely:- **kinetic** (the energy of moving objects) and **potential** (energy that is stored). Energy can **transform** from one type to another, but it can never be destroyed or created. The different types of energy include:- thermal energy, radiant energy, chemical energy, nuclear energy, electrical energy, motion energy, sound energy, elastic energy and gravitational energy. Missing/bypassing without mentioning the type of energy used by Internet in a list like Figure 3, cannot be ignored because computer science has become a

crucially important science, being applicable in all disciplines of both social & natural sciences. The type of energy used by **Internet** is **Electrical Energy** (Fig. 3).

Ganti's definition of life (living-thing) and the Nonenzymatic Chemoton Model of Minimal Life are dangerously misleading lies. Ganti was ignorant of "Law of Conservation of Matter" which states that matter is neither created nor destroyed. That was the reason why he failed to realize that the terms "nonliving-thing & Biology" were wrong to be used in science [23].

Figure 7: Photo of **Tibor Ganti**, a Hungarian biologist.

Ganti was a biologist who stated "**Chemoton Model (Theory) of Minimal Life.**" At present, **Ganti's** definition of life (living-thing) and Chemoton Model of Minimal Life are proved false by the **Perfect Law of Genomological Sciences** [18, 19].

Prof. Dr. **Tibor Ganti** (born 10 Sep. 1933 and died 24 Apr. 2009).

CONCLUSION

The two terms genomological virus and computer virus are absolutely different from each other and have no relation at all, because the genomological virus is a genomic-thing whereas the computer virus is a man-made (written) kind of malware, malicious program, application, or software. A computer virus is a nongenomic-thing.

The term *replication* (a type of reproduction in Microgenomology) is not appropriate to use for computer viruses as it is used only in microgenomology and genomics. Instead, the term *automatic copy paste* is appropriate & scientifically true since matter is neither created nor destroyed. For example, you do not use the term *pregnant* for helminth parasites, instead you use the term *gravid* with eggs or larvae.

The list of similarities displayed in Table 1, between genomological viruses and computer viruses are only analogical or metaphoric similarities and not homologically, genomically, or evolutionally related similarities.

The type of **energy** used by **Internet/Network** is not included in Figure 3 and it must be the **Electrical** one. Missing/bypassing the type of energy used by **Internet** (in such a list of types of energy, like in Figure 3) cannot be tolerated because computer science has become the nucleus for the effective performance or achievements in all disciplines of both social & natural sciences.

Cyber security can be 100% efficient if and only if attacks by black hat hackers & unethical grey hat hackers are prevented 100%.

Ganti's definition of life (living-thing) by way of **Nonenzymatic Chemoton Model of Minimal Life** is one of the dangerously misleading lies found in the **fake sciences of Biology**. Ganti was wrong not only in categorizing (dividing) matter into living & nonliving-things but he was also ignorant of "**Law of Conservation of Matter**" which states that "**matter is neither created nor destroyed.**" As a result, he failed to realize that the terms "**Nonliving-thing & Biology**" were wrong in the **first place** to be used in science.

The **Perfect Law of Genomological Sciences** is a type of scientific law that will never be outdated.

Genomology is a **Giant Ethiopian Science** of educational asset contributed to all human races of the world by dismissing **fake sciences of Biology** that have been paralyzing scientific progresses of student children as well as MSc & PhD students of all human races of this planet (Earth) for centuries.

Genomology consists of:

- ▶ **pure genomology**,
- ▶ **genomotechnology**,
- ▶ **medical sciences**, flourishing from Genomology, and
- ▶ **agricultural sciences**, flourishing from Genomology.

Genomology is a set of **supersciences** because:

- ▶ the automatic molecular machine called **Genome** that synthesizes all genomic-things is found in the system of **Genomology** only,
- ▶ the scientist himself who creates all sciences is synthesized by self-acting (automatic) genomic reactions only,
- ▶ out of the three types of **Universal Reactions of Matter**, the automatic reaction without the involvement of **human hands & minds** is only that of **Genomology**, and
- ▶ its automatic genomic reactions are miraculously complex.

Feleke Eriso Orbalo is the **Supergreatest Scientist** among all **Greatest Scientists** of the entire world.

Based on the universal reactions of matter, reupdated confirmation with the best of truth:

- ▶ Superpower in **Best Controlled Quality Education** & in **Best Quality Reputable Journals** in the entire world is **UK** at present (with the publication fee being minimized down to £25 GBP in favor of global progress/development of science & technology),
- ▶ Superpower in **Medical & Agricultural Sciences** in the entire world is **India** at present,
- ▶ Superpower in **Economy** in the entire world by dethroning USA with an excess of giant difference is **China** at present,
- ▶ Superpower in **Nuclear Military Science** in the entire world is **Russia** at present, and

► Superpower in **Power of Mind in Genomological Sciences** in the entire world with no rival & claimer is **Ethiopia** forever, **being nondethronable** endlessly for countably infinite number of the future generations to come (i.e., of all human races)!!!!

Mike Tyson's top 25 greatest knockouts are metaphorically similar to how **true sciences of Genomology** knocked out or dismissed **fake sciences of Biology** from the world of meaningful Natural Sciences (Watch **Table 2**, 3rd, video 1).

Ethics: I declare that no ethical error is committed in the production of this paper. I also declare that I don't have any conflict of interest with anybody.

Acknowledgements

I am deeply grateful to scientists acknowledged in the text and list of references of this paper for their providing me with confidential data that can be counterchecked, for their correctness, with observable facts in the natural environment as well as with truths in reputable journals, and Internet. This is so because science cannot develop without science. I am really thankful to authors of musical art & musicians for their carefully following and transforming my published articles of genomological sciences into musical films. I am very strongly thankful to those global scientific communities for their genuinely following my task of performing to establish the sciences of Genomology and for their authentic thanking me by way of emails for what I have contributed to the scientific world of Genomology.

All of the past and present time individual members of the entire **Global Scientific Community of Natural Sciences** such as **Antonie Van Leeuwenhoek of Dutch Republic (Netherlands)**, **Antoine Lavoisier of France**, **Gregor Mendel of Austria**, **Crick & Watson of UK & USA** respectively, **Ivanovsky Dmitri of Russia**, **Toole G & Toole S of UK**, **Albert Einstein of Germany**, **Michael Faraday of UK**, **Edward Jenner of UK**, **William B Coley of USA**, **Stanley B Prusiner of USA**, **David Baltimore of USA**, **Frederick William Twort of UK**, **Charles Babbage of UK**, and **Sir Isaac Newton of UK** are the **Global Teachers** who taught Father of the **Perfect Law of Genomology**. Thus, the Father of **Perfect Law of Genomology** is **Proud** of & he is also the **Pride** of his **Global Teachers**, because the **purpose of teaching is to capacitate students to solve problems** that **had been said and believed impossible by the previous generations of human races**.

I became the **Supergreatest Scientist** in the world by learning from the famous and inspiring **bests & greatest**s among the scientists of the world. In other words, **Greatest Global Teachers of Science** produced the **Supergreatest Scientist** who is me. This is so because the **key objective of Teaching & Learning** is to make **Students More Powerful** than the **Teacher** in **Novel**,

Academic, and **All Rounded Productive Achievements**; otherwise, there would be no point in the profession of teaching!!!! **Profession of Teaching** is the **Parent Profession of All Professions** known on Earth. The concreted evidence for the **Greatestness of Global Teachers of Science** who taught **Feleke Eriso Orbalo**, is **Feleke's** being the:

- ▶ **Supergreatest Scientist**, and
- ▶ Father of the **Perfect Law of Genomology**.

To the best of my knowledge, **I Feleke EO** declare that **Love & Respect** I have for my:

- ▶ **Educational Parents** (Global Teachers of Science who taught me), and
- ▶ **Genomological Parents** (my father & my mother)

are exactly the same (**Equational**).

Connect your computer to Internet. Steps of opening the video: Select, copy and paste the title of the video (only the blue colored & underlined) on Google search space on your computer desktop screen and then press Enter Key of your computer keyboard. Click Video. Now, click the slide with the correct Title of video you pasted because when the video is copied & pasted, several other unwanted videos will appear together. When video 1 ends playing, repeat the same steps for playing of video 2 etc.
