INTRODUCTION

The types of classification of viruses available in literature include ICTV Classification, Holmes Classification, LHT System of Virus Classification, Casjens & Kings Classification of Vrus, and Baltimore Classification of Virus. Out of the aforementioned schemes of classification Baltimore classification of viruses was found to be more pragmatic than others being free from bewildering events. Based on Baltimore classification viruses can be categorized into seven groups. Baltimore created his classification scheme based on the central role of the translational machinery and the importance of viral mRNAs in programming viral protein synthesis. In this scheme, he placed mRNA in the center, and described the pathways to mRNA from DNA or RNA Genomes [1 to 15]. This arrangement highlights the obligatory relationship between the viral Genome and its mRNA. By convention, mRNA is defined as a positive sense (+) strand because it is the template for protein synthesis. A strand of DNA or the equivalent sequence is also called the (+) sense

strand. RNA and DNA strands that are complementary to the (+) sense strand are, of course, called negative sense (-) strands [1, 9] . The Baltimore classification system of viruses is pragmatically valid molecular algorithm for genomologists of virology. The concepts of this scheme are useful for understanding information flow about viruses that have different types of **Genome** [16-21].

The key objective of this study is to forward a pragmatically consistent and persuasive scheme for the classification of viruses where the **Genome** is the unit of both structure & function of every individual of viruses and of all other genomic-things.

METHODOLOGY & RESULTS

The contents of **Figures** herebelow are designed to serve as evidential Results in the targetful strategy of this study and that is why it is entitled **Methodology & Results** hereabove.

Discussion

As it can be seen from Table 2, **UK** has spectacularly been proved to be the top country in contributing **Greatest Scientists** of creating sciences for all human races of the world. The two major factors that enabled **UK** to be the best country in the entire world in contributing the largest number of **Greatest Scientists** in creating sciences are its:

- ▶ **Best Controlled Quality Education, and**
- ▶ **Best Quality Reputable Journals.**

The fact that **UK** is the best country in contributing the largest number of **Greatest Scientists** in creating sciences for all human races of the world is imparted by the set of **output** and the **countercheckable concreted evidences** about **UK's** being **superpower** in **Best Controlled Quality Education**, and in **Best Quality Reputable Journals**.

Since education is power, **UK** was enabled or capacitated to colonize many countries on the surface of Earth in the past human history because of its being empowered by **Best Controlled Quality Education** and based on that truth it had been stated as “the sun never sets on UK.” However, those colonized countries by **UK** are free at present. The phrase “the sun never sets on England” refers to the fact that the sun was always shining on at least one of the expanded British Empire’s historical territories or colonized countries that covered quarter (25%) of Earth’s land surface. Now, **Feleke’s Genomosphere** has covered 100% of Earth’s land & water surfaces, being termed **Ethiopian Empire of Genomosphere**. Thus, **the sun never sets** on **Ethiopian Empire of Genomosphere**. The Earth’s land surface is divided into 7 continents and are listed in the order beginning from the **largest** continent to the **smallest** one: Asia, Africa, North America, South America, Antarctica, Europe, and Australia. The water surface of the Earth includes: -lakes, rivers, seas, and oceans.

The **Supergreatest Scientist** in creating sciences (**Father of Genomic-things**) has been empowered by **Education** and he is the **Father of Genomosphere** that covers the entire world (planet Earth) with its inhabiting genomic-things of viroids, viruses and microscopic organisms up to angiosperms and humans forever with no rival and claimer.

CONCLUSION

Classification based on the **structural & functional** differences of **Genome** among viruses is the **best** and **superaccurate**, because **Genome** is the **unit of both structure & function** in all genomic-things with no trace of exception. In other words, at times of reproduction (self-replication) or synthesis of proteins in each type of virus, it is completely based on the characteristic algorithm or steps of reactions from its **Genome** to **mRNA** which is invariably the **same final transcript** for all seven classes (groups) of viruses.

In summary:

Its (viral) **Genome** $\xrightarrow{\text{to}}$ **mRNA**, in each of the seven classes of virus (see **Figures 4, 5, 6**).

Not only in viruses, also among viroids, grouping or classification of viroids is absolutely based or forced to be based on the **structural & functional** differences of their **Genome**, because this is the only and **spectacularly concreted truth** with no competing option at all.

The chemical composition of **Genome** of all genomic-things from that of viroids, viruses and microscopic organisms up to that of angiosperms and humans is the **same being composed (built or made up) of nucleotides**. It is because of this similarity in chemical composition that about 8% of human **Genome** is said to be that of virus combined with or inserted into compatibly as an autograft or isograft instead of being rejected as a xenograft or an allograft.

In **Microgenomology**, viroids, viruses and single-celled genomic-things are organisms of **single-genomed** individuals (**single-genomed** genomic-things) whereas genomic-things are referred to as **multigenomic** organisms (genomic-things). In this context, the term organism is equivalent to genomic-thing in meaning. In terms of size single-celled organisms are **microscopic** (can be seen only with a microscope), and viruses are **submicroscopic** whereas viroids are **subviral**. There are also multicellular organisms that are **microscopic** in size. For example, filarial worms are multicellular **microscopic** nematodes that cause **filariasis** in humans. On the other hand, any organism that can be seen with the naked eye (without a microscope) is called a **macroorganism** (a macrogenomic-thing). Thus, in terms of size all genomic-things can be categorized into four groups namely:

- ▶ **Subviralgenomic-things (Subviralorganisms, or Viroids),**
- ▶ **Submicroscopicgenomic-things (Submicroorganisms, or Viruses),**
- ▶ **Microgenomic-things (Microorganisms), and**
- ▶ **Macrogenomic-things (Macroorganisms).**

Baltimore classification of viruses is free from bewildering and simplifies the understanding of information flow of viruses with different **Genome** configurations, because his scheme is based on pragmatic & obligatory relationship of viral **Genome** & its **+mRNA**.

Genome encodes genes  Genes encode proteins.

Baltimore's focusing on the strong obligatory relationship of viral **Genome** & its **mRNA** in his scheme of classifying viruses, has made Baltimore classification of viruses the best scheme of all types of classification systems of viruses such as **ICTV Classification**, **Holmes Classification** and **LHT Classification** because the viral **Genome** he focused on is the only **automatic molecular machine** that synthesizes **itself** & **every individual virus** in each species of **all genomic-vruses** (i.e., as it does in all other genomic-things).

 The weak point of **David Baltimore** is that he had been **enslaved** by the **fake sciences of Biology** like any other biologist of the world or like any other professor of the **fake biological sciences** until the emergence of **Genomology**. Now, he is free being a genomologist (superscientist) with the **Father of Genomology**.

 The fact that **true sciences of Genomology** have freed the scientific communities of the world from the dangerously paralyzing slavery imposed by **fake sciences of Biology** is undisputed.

 Remember that in previous published articles, it has been proved that **viruses & viroids** are certainly genomic-things.

 Based on the concrete & evidential information we have at present, the best **planet** in the universe with the most **compatible environment** for humans & for other genomic-things is the **Earth** which we have to safeguard by way of **effective environmental protection**. Note that the **sciences of Genomology** are the sciences of **1st** priority to invest in with the highest validity for the well-being of humans!!!!

 If intensive research activity had been carried out and if attention had been given to **sciences of Genomology** as time & plenty of money had been invested in the fields of **arms-race**, the **age (life-span)** of individuals in *Homo sapiens* could have been increased from **100 to 200 years** by this time!!

 Hereafter, it is very strongly believed that genomologists (superscientists) will come up or emerge with wonderful findings or achievements in genomological sciences, because the only key **automatic molecular machine** called **Genome** that synthesizes **itself & every individual of all genomic-things** from viroids up to angiosperms and humans is known (identified).

 **Feleke Eriso Orbalo** is the **supergreatest** scientist who **removed** the **junk (Biology)** from & **added accuracy (Genomology)** to the world of **Natural Sciences**.

 The **sun never sets** on **Ethiopian Empire of Genomosphere** that covers 100% of Earth's land & water surfaces forever with no rival and claimer.

 **Feleke Eriso Orbalo** is the scientist who generated **Ethiopian Empire** of genomological sciences with its **Perfect Law of Genomology** contributed to all races of *Homo sapiens* known to cover 100% of **Earth's** surface on which the **sun never sets** forever.

 **Feleke Eriso Orbalo** is the scientist whose achievements of **genomological sciences** are unique being far beyond the expectation of **global scientific communities**.

 The reason for why **India** and **China** who are **superpowers** in the aspects mentioned in Figure 8 have been found to be **zero** in contributing **Greatest scientists** in creating sciences is because they are better effective in **businessizing** or **utilizing** the created sciences than others rather than in creating sciences for the world.

 The **Perfect Law of Genomology** which states that **Genome** is the **unit** of both **structure & function** in every individual of all genomic-things is a type of scientific law that will never be outdated, existing (valid & accurate) forever with the scientific world of human races wherever/whenever they exist.

 The **Perfect Law of Genomology** also states that **Genome** is the **unit of evolutionary change**.

 **Genome** is not only the **unit** of both **structure & function**, it is also the automatic synthesizer of every individual in all genomic-things whereas the **Cell** is not the automatic synthesizer of any individual in all genomic-things, verifying the fact that the **Cell Theory** is completely **false**.

 Based on the universal reactions of matter, reupdated confirmation with the best of truth:

▶ Superpower in **Best Controlled Quality Education** & in **Best Quality Reputable Journals** in the entire world is **UK** at present (with the publication fee being minimized down to £25 GBP in favor of global progress/development of science & technology),

▶ Superpower in **Medical & Agricultural Sciences** in the entire world is **India** at present,

▶ Superpower in **Economy** in the entire world by dethroning USA with an excess of giant difference is **China** at present,

▶ Superpower in **Nuclear Military Science** in the entire world is **Russia** at present, and

▶ Superpower in **Power of Mind in Genomological Sciences** in the entire world with no rival & claimer is **Ethiopia** forever, **being nondethronable** endlessly for countably infinite number of the future generations of all human races to come!!!!

Genomology is a **Giant Ethiopian Science** of educational asset contributed to all human races of the world by dismissing **fake sciences of Biology** that have been paralyzing scientific progresses of student children as well as MSc & PhD students of all human races of this planet (Earth) for centuries.

Genomology consists of:

- ▶ pure genomology,
- ▶ genomotechnology,
- ▶ medical sciences, flourishing from Genomology, and
- ▶ agricultural sciences, flourishing from Genomology.

Mike Tyson's top 25 greatest knockouts are metaphorically similar to how **true sciences of Genomology** knocked out or dismissed **fake sciences of Biology** from the world of meaningful Natural Sciences (Watch **Table 2**, 3rd row, video 1).

Acknowledgements

I am deeply grateful to scientists acknowledged in the text and list of references of this paper for their providing me with confidential data that can be counterchecked, for their correctness, with observable facts in the natural environment as well as with truths in reputable journals, and Internet. This is so because science cannot develop without science. I am really thankful to authors of musical art & musicians for their carefully following and transforming my published articles of genomological sciences into musical films. I am very strongly thankful to those global scientific communities for their genuinely following my task of performing to establish the sciences of

Genomology and for their authentic thanking me by way of emails for what I have contributed to the scientific world of Genomology.

All of the past and present time individual members of the entire **Global Scientific Community of Natural Sciences** such as **Antonie Van Leeuwenhoek of Dutch Republic (Netherlands)**, **Antoine Lavoisier of France**, **Gregor Mendel of Austria**, **Crick & Watson of UK & USA** respectively, **Ivanovsky Dmitri of Russia**, **Toole G & Toole S of UK** , **Albert Einstein of Germany**, **Michael Faraday of UK** , **Edward Jenner of UK**, **William B Coley of USA**, **Stanley B Prusiner of USA**, **David Baltimore of USA**, **Frederick William Twort of UK**, **Charles Babbage of UK**, **Sir Isaac Newton of UK**, and **William Harvey of UK** are the **Global Teachers** who taught Father of the **Perfect Law of Genomology**.
